**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/633,329	<b>Applicant(s)</b> GOODE ET AL.	
	<b>Examiner</b> ROBERT L. NASSER	<b>Art Unit</b> 3735	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3735

Applicant's election without traverse of Group I, claims 177-200 in the reply filed on 1/21/2010 is acknowledged. Claims 201-270 are withdrawn from consideration.

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 177-188 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims recite a method that does not transform matter or require a particular device. The examiner notes that if applicant recite that the modifying step was performed in a processor, or used similar language, it would overcome this rejection

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 177-200 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The current claims recite that the conversion function is modified to increase the clinical acceptability of the matched data pairs. These exact words do not appear in the specification. To the best of the examiner's understanding, applicant is referring to

Art Unit: 3735

paragraph [0338] of the published application 2005/0027180 which says that the regression line is pivoted about a point to comply with clinical acceptability standards. This function lacks enablement. First, it is unclear what point the line is pivoted about. Second, it is unclear how pivoting the line complies with acceptability standards. Third, it is unclear how the pivoting works. Fourth, it is unclear how this process increases acceptability. Clarification is required.

Claims 177-200 define over the art in that none of the art modifies the conversion function, as recited in the claims. However, upon resolution of the above enablement issue, the art rejection will be revisited.
